

means for selectively activating said camera and said microphone for capturing images and sounds within a range of said housing;

means for activating said cellular telephone for wirelessly communicating with [the] a specific remotely located telephone by dialing the number of [the] said specific remotely located telephone and, when said cellular telephone and [the] said specific remotely located telephone are telephonically connected, then transmitting said images and said sounds from said camera and microphone to [the] said specific remotely located telephone concurrently with the capturing of [the] said images and said sounds;

41
audio
a memory means in said housing operatively connected to said camera, said cellular telephone and said battery means for selectively storing said images captured by said camera and said sounds captured by said microphone;

means for selectively causing said stored images and said stored sounds to be transmitted by said cellular telephone to [the] said specific remotely located telephone;

said memory means including an audio recorder mounted in said housing and having means for selectively recording audible transmissions during the person-to-person telephone calls to and from said cellular telephone and for selectively recording sounds within a range of said housing without a telephone call; and

switch means for selectively and separately operating (a) said means for selectively activating said camera, (b) said microphone, (c) said cellular telephone, (d) said memory means, (e) said means for selectively causing said stored images and said stored sounds to be transmitted, and (f) said audio recorder.

9. 74. (Thrice Amended) A handheld portable information recording and communication device for communicating with [a] remotely located telephones, comprising:

a camera[, a microphone] and a cellular telephone electrically connected and mounted in a portable housing of a size and weight for being handheld by a person, said cellular telephone having a microphone, a speaker and a dial pad for selective use by the person for placing and receiving person-to-person telephone calls to and from remotely located telephones;

HF
ant
a battery means in the housing for supplying electrical power to said camera[, said microphone] and said cellular telephone;

means for selectively activating said camera and microphone for capturing images and sounds within a range of said housing;

alarm sensor means mounted in said housing for detecting a sound or movement within a predetermined range of said housing;

means for selectively arming said alarm sensor means for then automatically operating said means for activating the camera and microphone and activating said cellular telephone, when said sensor means detects a sound or movement, for wirelessly communicating with [the] a specific remotely located telephone by dialing the number of [the] said specific remotely located telephone are telephonically connected, then transmitting said images and said sounds from said camera and microphone to [the] said specific remotely located telephone;

H2
Cmcl

a memory means in said housing operatively connected to said camera, said cellular telephone and said battery means for selectively storing said images captured by said camera and said sounds captured by said microphone;

means for selectively causing said stored images and said stored sounds to be transmitted by said cellular telephone to [the] said specific remotely located telephone;

said memory means including an audio recorder mounted in said housing and having means for selectively recording audible transmissions during the person-to-person telephone calls to and from said cellular telephone and for selectively recording sounds within a range of said housing without a telephone call; and

switch means for selectively and separately operating (a) said means for selectively activating said camera, (b) said microphone, (c) said cellular telephone, (d) said alarm sensor means, (e) said means for selectively arming said alarm sensor means, (f) said memory means, (g) said means for selectively causing said stored images and said sounds to be transmitted, (h) and said audio recorder.

9.
~~54~~ (Thrice Amended) A handheld portable information recording and communication device for communicating with [a] remotely located telephones, comprising:

H3
Cmcl

a digital camera[, a microphone] and a cellular telephone electrically connected and mounted in a portable housing of a size and weight for being handheld by a person, said cellular telephone

having a microphone, a speaker and a dial pad for selective use by the person for placing and receiving person-to-person telephone calls to and from remotely located telephones;

a single battery mounted in said housing for supplying electrical power to said digital camera[, said microphone] and said cellular telephone;

alarm sensor means mounted in said housing for detecting a sound or movement within a predetermined range of said housing;

H3
Can't
means automatically activating said digital camera and said microphone for capturing images and sounds within a range of said housing when said alarm sensor means detects a sound or movement;

a switch means on said housing[;], said switch means including means for selectively arming said alarm sensor means;

means for automatically activating said cellular telephone when said sensor means is armed and detects a sound or movement for wirelessly communicating with [the] a specific remotely located telephone by dialing the number of [the] said specific remotely located telephone and, when said cellular telephone and [the] said specific remotely located telephone are telephonically connected, then transmitting said images and said sounds from said [microphone and] digital camera and said microphone to [the] said specific remotely located telephone;

a digital memory means for storing said images captured by said digital camera and said
sounds captured by said microphone;

means for selectively causing said stored images and said stored sounds to be transmitted by
said cellular telephone to said specific remotely located telephone;

43
C/A
said switch means also operable for manually activating said digital camera without
activating said cellular telephone;

said switch means also operable for manually activating said digital camera and said cellular
telephone for both capturing and transmitting said images;

said digital memory means including an audio recorder mounted in said housing and having
means for selectively recording audible transmissions during the person-to-person telephone calls to
and from said cellular telephone and for selectively recording sounds within a range of said housing
without a telephone call;

means for selectively reproducing sounds recorded on said audio recorder at said housing;

a radio means mounted in said housing and having controls for selective operation of said
radio means[,]; and

H3
Cncl
a jack connection for directly connecting said digital memory means of the device to a television for reproducing or a computer for downloading said recorded images and said recorded sounds from said digital memory means.

Add the following new claims 64-69:

12.
64. A handheld portable cellular telephone ^{having additional} with information, video and audio capabilities ^{with the} for communicating with the integral cellular telephone which is normally for ordinary use for ^{by a person} ordinary calls comprising:

H4
Cncl
a camera, a microphone and an ordinary cellular telephone electrically connected and mounted in the same and a conventional housing of a size and weight for being handheld by a person; said cellular telephone having a microphone, a speaker and a dial pad accessible for selective use by the person for placing and receiving normal person to person telephone calls as with a conventional cellular telephone; battery means in the housing for supplying electrical power to said camera, microphone and said cellular telephone; means for selectively activating said camera and said microphone for capturing images and ^{sounds} ~~sound~~ within a range of said housing; and means for activating said cellular telephone for wirelessly communicating with a specific remotely located telephone at a remote site by automatically dialing the number of the said specific remotely located telephone in response to the person's command or pre-selected automatic sensing means and, when said cellular telephone and said remote site are telephonically connected, the stored or current images and sounds from said camera and said microphone are transmitted to the said connected remote site, ^{an} ~~by the~~ audio means of the said ordinary cellular telephone via encoded data means of a

modem; and said recording of ^{images} ~~video~~ and ^{sounds} ~~audio information~~ can be either from automatic sensing means activating said recording or from the person's commands, and said recordings are conveyed either by the person selected dialing or pre-selected automatic dialing ~~and conveyance~~ means.

^{13.}
~~65.~~ The handheld cellular telephone of claim ~~64~~ ¹², wherein said automatic sensing means includes a motion sensor.

¹⁴
^{15.}
~~66.~~ The handheld cellular telephone of claim ~~64~~ ¹², wherein said automatic sensing means includes an infrared sensor.

^{17.}
~~67.~~ The handheld cellular telephone of claim ~~64~~ ¹², wherein said automatic sensing means includes an ultrasonic sensor.

^{14.}
~~68.~~ The handheld cellular telephone of claim ~~65~~ ¹³, wherein said automatic sensing means includes an ultrasonic sensor.

¹⁶
~~69.~~ The handheld cellular telephone of claim ~~66~~ ¹⁵, wherein said automatic sensing means includes an ultrasonic sensor.

REMARKS

The Office Action mailed November 7, 2000 (hereinafter "the Office Action") rejects all of the previously pending claims as unpatentably obvious under 35 U.S.C. § 103 by citing and applying a new reference (Purdy et al. 5,144,661) and states that applicant's previous arguments "... are
